DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-29, drawn to a vehicle straightening bench, classified in class 72 subclass 447.

Group II. Claims 30-38, drawn to a vehicle straightening bench with a hydraulically powered lift and pulling tower, classified in class 72, subclass 457.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Group I does not require the specific hydraulic powering mechanism as claimed in Group II. Additionally, Group II does not require the specific carriage assembly as claimed in Group I. The subcombinations obviously have separate utility from one another. See MPEP § 806.05(d).
